OCI No. 3185/63
28 October 1963

MEMORANDUM FOR: Assistant Director, Current Intelligence

SUBJECT : Preliminary Comment on Field Analysis of
Mission 3235, Flown on 26 October 1963

1. This mission was flown over southern North Vietnam and southern Laos and was probably intended to compliment Mission 3231 which covered northern North Vietnam and some adjacent areas of northern Laos. However, heavy cloud cover--100 percent in most cases--precluded interpretation of practically all the major targets.

2. Although the field analysis did not disclose anything of intelligence significance, the more detailed analysis usually carried out by NPIC might provide some useful information.
